

JOBS!

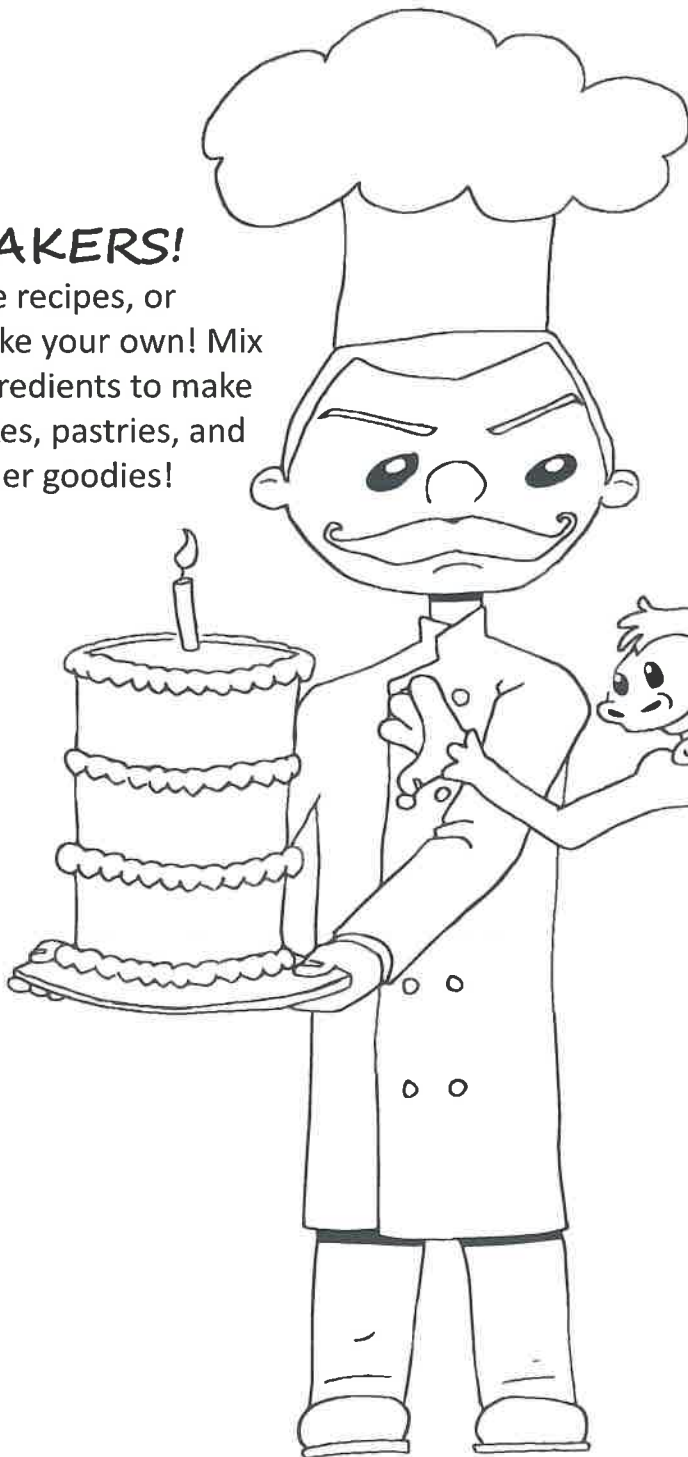

a coloring book for elementary school students

Careers are everywhere
from the bakery to the zoo.
Grownups go to work every day
because there's so much work to do.

BAKERS!

Use recipes, or
make your own! Mix
ingredients to make
cakes, pastries, and
other goodies!

ZOOLOGISTS!

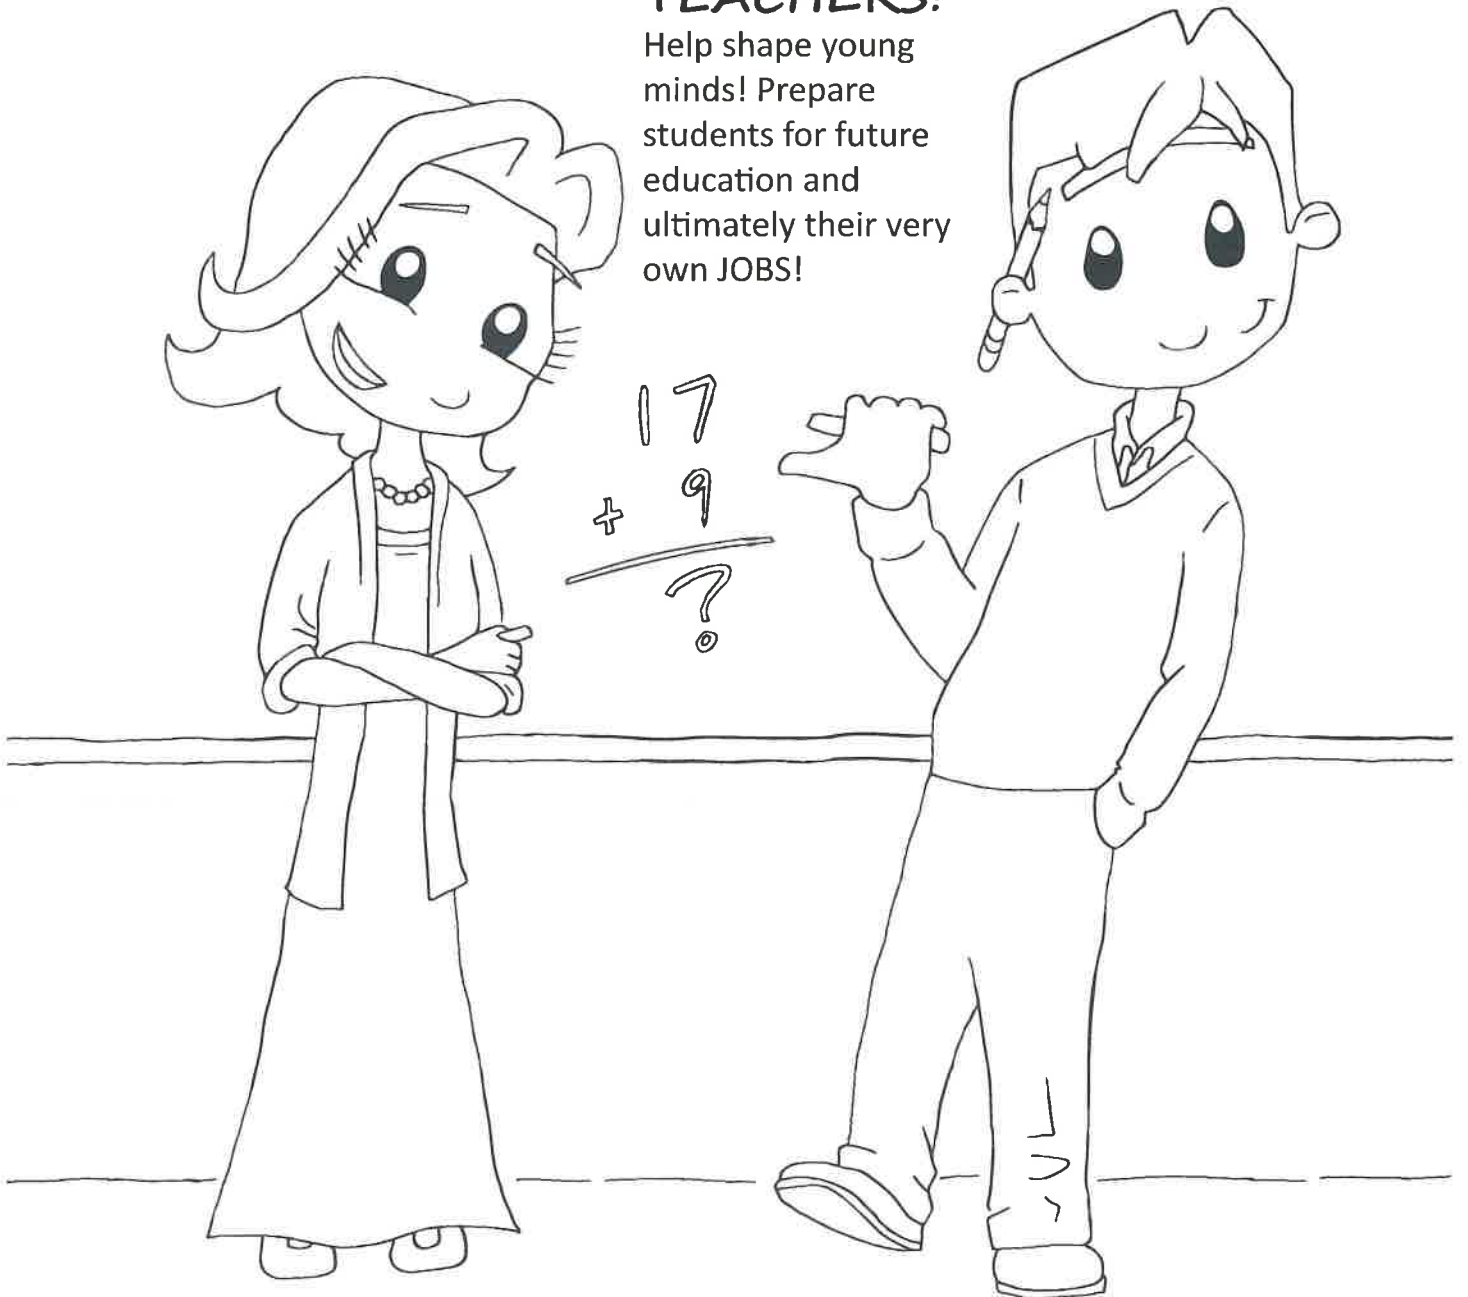

Work outdoors! Study
animals and wildlife in their
natural habitats!

The kinds of things people do at work depends on the job they choose.
And how long someone goes to school can affect which jobs they can do.

TEACHERS!

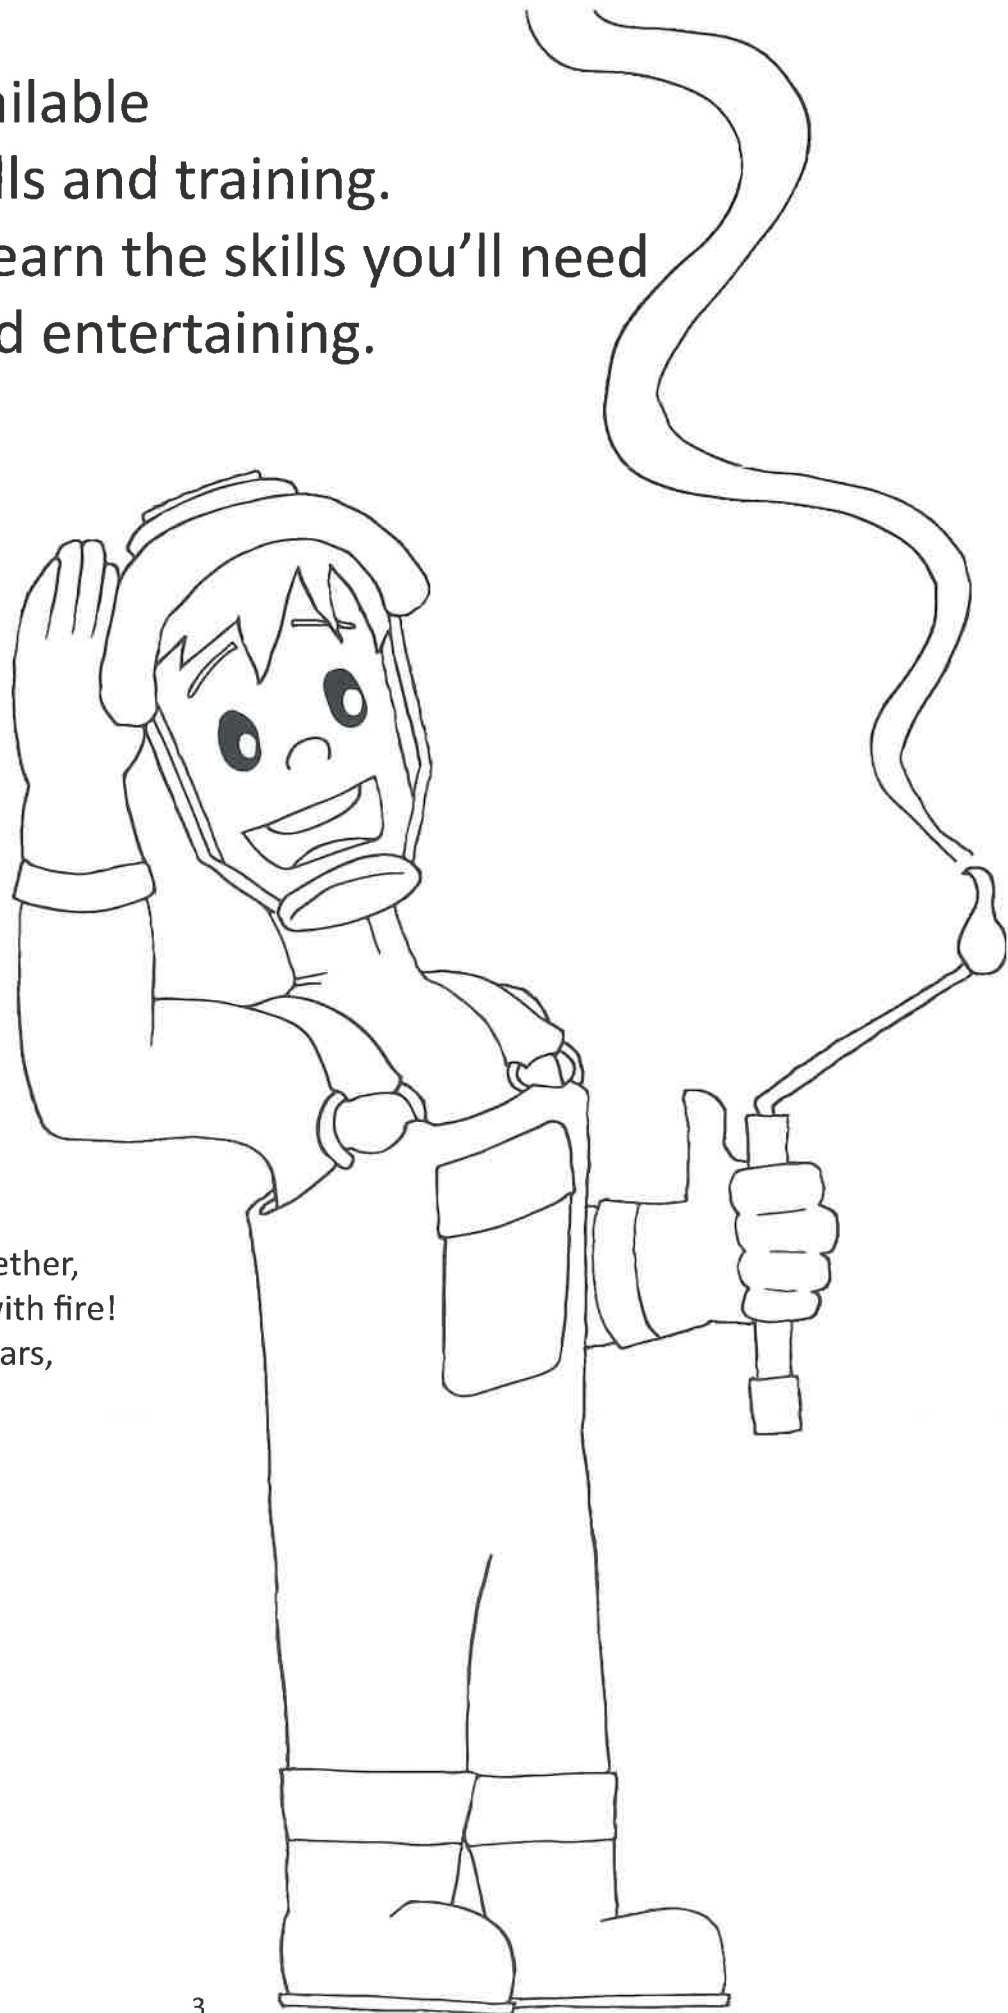

Help shape young minds! Prepare students for future education and ultimately their very own JOBS!

Every single job available
requires special skills and training.
So make sure you learn the skills you'll need
for the jobs you find entertaining.

WELDERS!

Join metal parts together,
or cut them apart, with fire!
Work on buildings, cars,
boats, and more!

Think of what you like to do,
what makes you happy, and the talents you have.
Because those are the things most important
when deciding which career you'd be best at.

ACTORS!

Memorize lines, rehearse,
and then ACTION! Portray
characters in theater,
television or film!

The careers in this book are just samples of some jobs you can consider. But there are many more available and the list just keeps getting bigger.

CHEMICAL ENGINEERS!

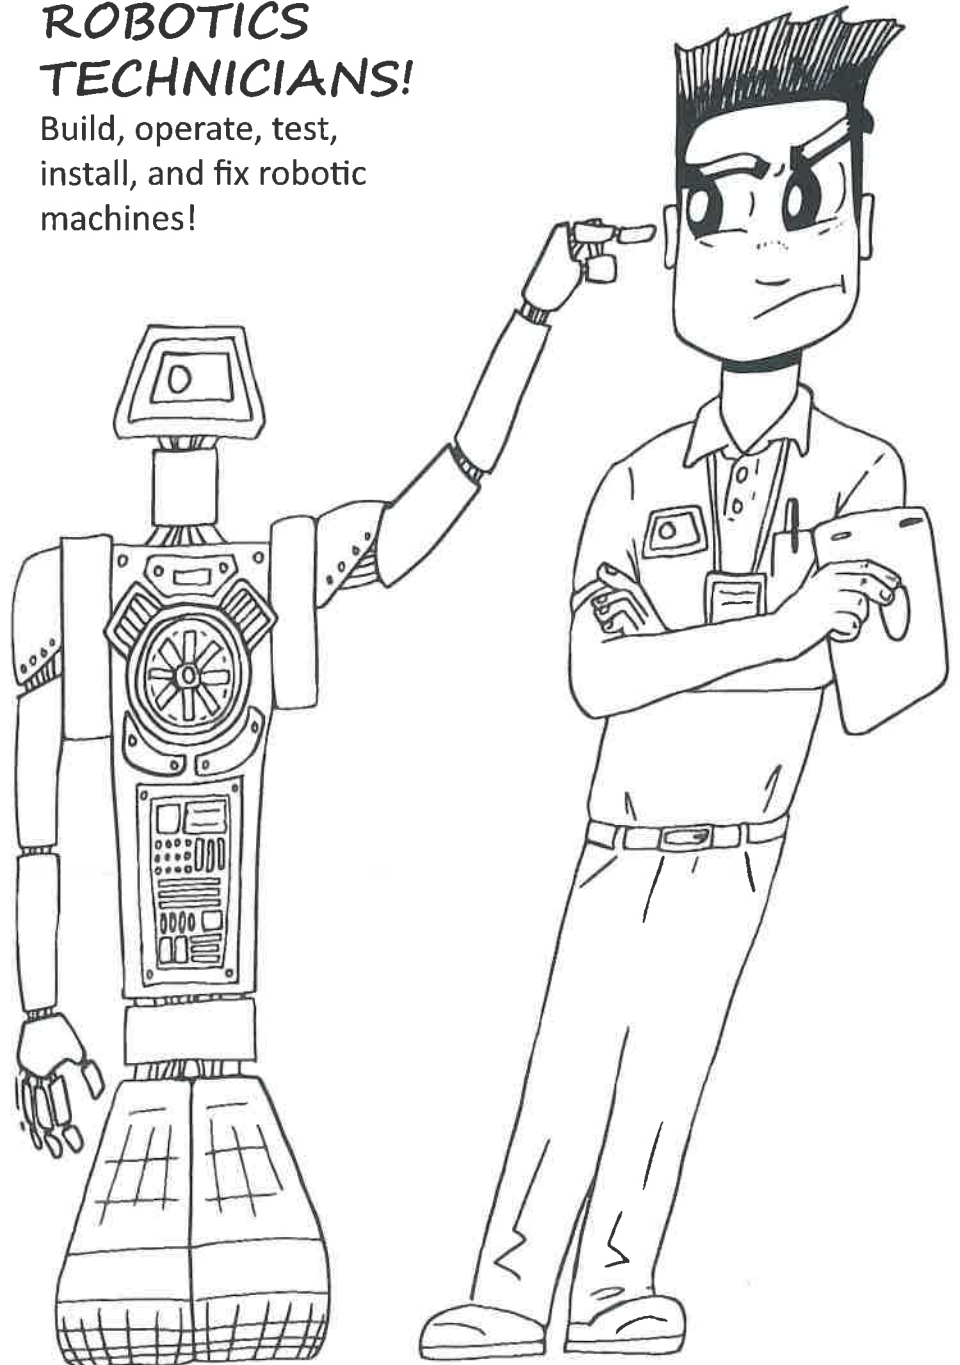

Use math and science to solve problems involving chemicals, fuel, drugs, food and other important products!

A bunch of jobs are out there.
More than you might know.
So be sure to learn about them all
the older you get and the bigger you grow.

ROBOTICS TECHNICIANS!

Build, operate, test,
install, and fix robotic
machines!

Every job is different and important
That's why there are so many--not a few.
And every job is super important
No matter what kind of work you will do.

ENVIRONMENTAL SCIENTISTS!

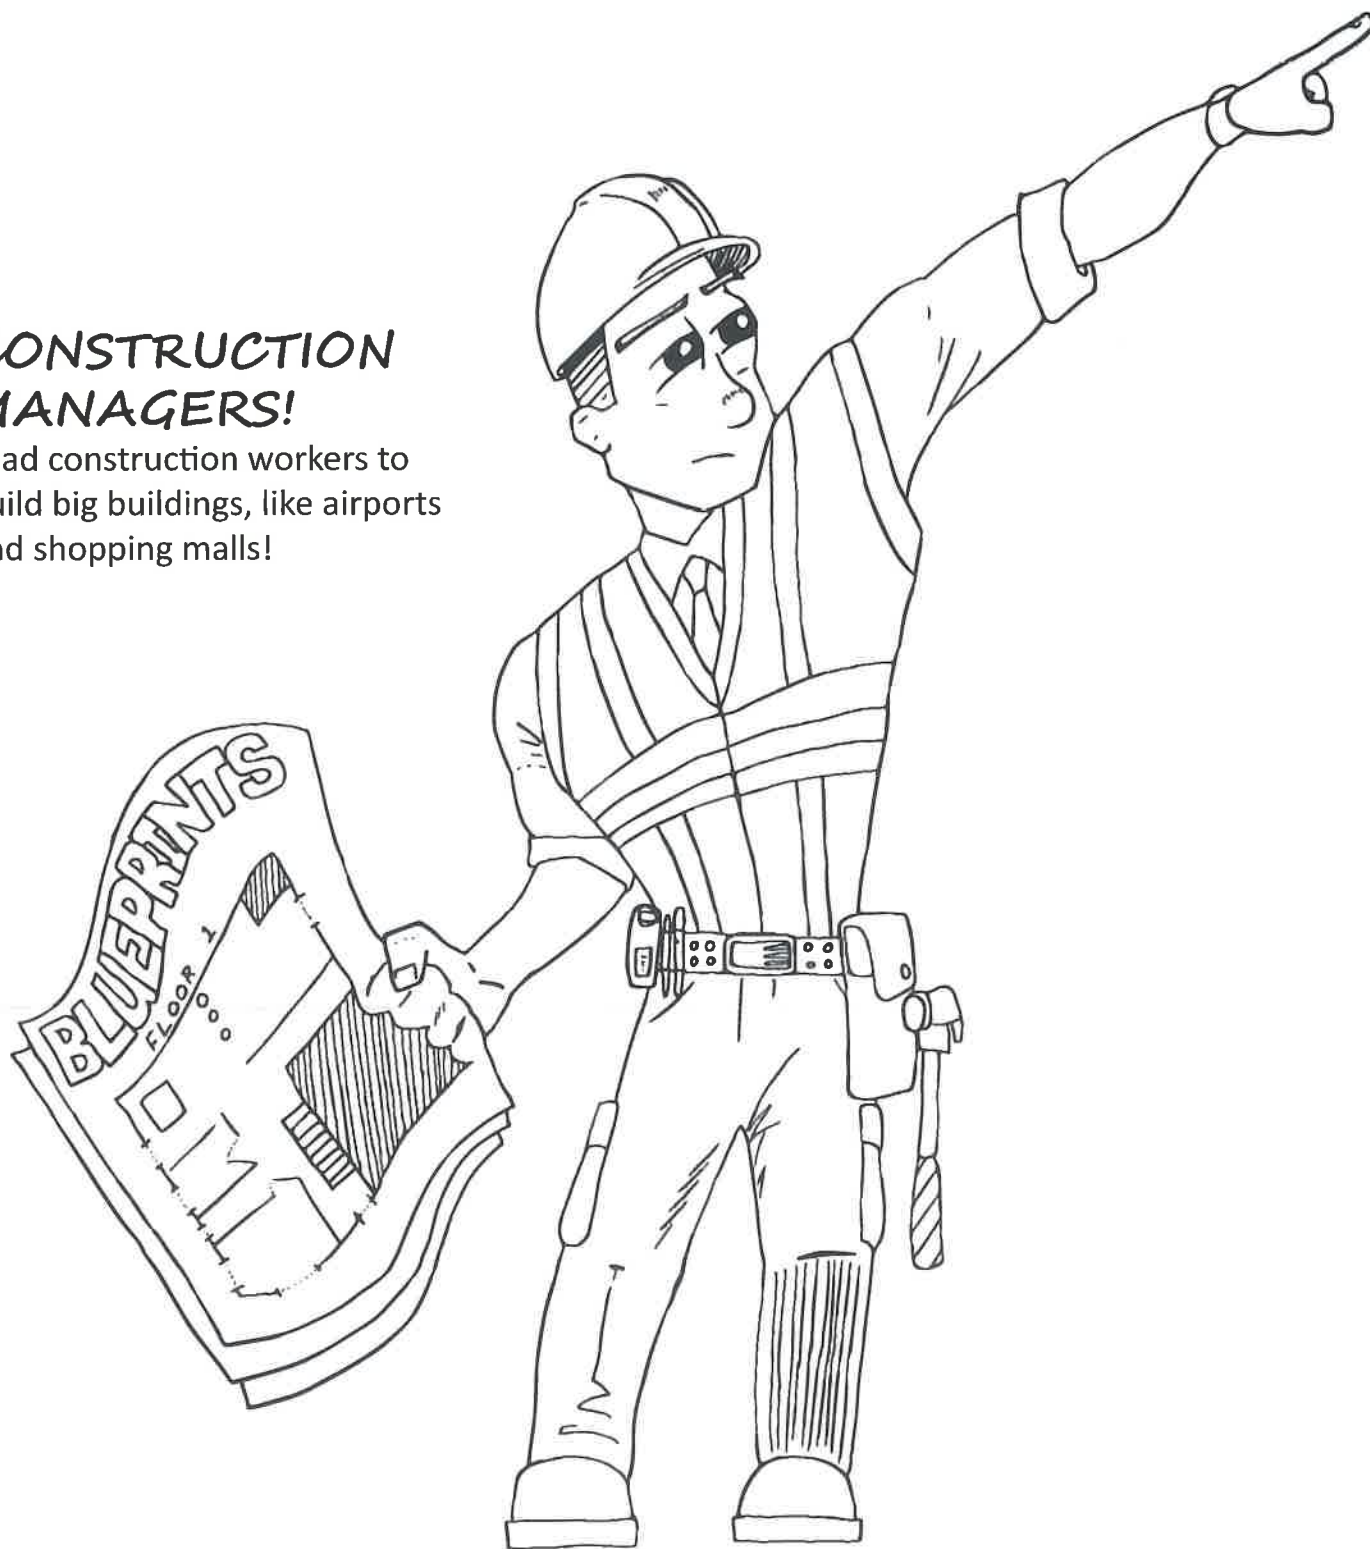

Protect human health and
wildlife! Collect data! Clean up
polluted areas!

From the starting-out jobs
all the way to the top,
when you work hard at your career,
your success will not stop.

CONSTRUCTION MANAGERS!

Lead construction workers to
build big buildings, like airports
and shopping malls!

That's why it's so important
to think of what's exciting to you.
Because folks always work hard at their jobs
when they care about what they do.

**REGISTERED
NURSES!**

Help sick people get better!
Give advice and support on
how to stay healthy!

Take time to imagine the job you want
and how you can make it fun.
Because everyone needs to work
and there's enough work for everyone!

**CHIEF
EXECUTIVES
(BOSSES)!**

Lead a group of people
to work together to
achieve success for your
organization!

So grab a pencil and start dreaming
of your future career. What do you see?
Now draw a picture of the grown up you
working a job that makes you happy!

**YOUR JOB
HERE!**
